- Invictus
- Sirius
- LA series
- Beryllium

ALL-IN-ONE

- Fusion
- Janus
- D-TOC

SIMULATION

- Cerium

The Trade Agreements Act sets forth requirements for government procurement, stating that products must be manufactured or substantially transformed in the United States or a designated country. For Military LED Displays, TAA compliance assures that the displays meet the necessary security and quality standards required by government agencies. China, North Korea, Iran are not permitted to be countries of origin to any agency of the U.S. government.

TAA approval by U.S. Customs and Border Patrol must be published in the Federal Register. Vanguard LED Displays, Inc., is the only LED video display company in the world that is TAA approved. This approval was published in the Federal Register on April 19, 2018.

Vanguard LED Displays, Inc., sources its LED diodes for its LED displays from Taiwan, a TAA-approved country. The value of the Taiwanese LED chips used by Vanguard LED Displays, Inc. is in excess of 65% of the total value of an LED display. These Taiwanese diodes are not altered or transformed in any way from its original state to their condition on the delivered LED display. As a result, Vanguard LED Displays, Inc.'s country of origin is Taiwan, a TAA-approved country.

The significance of TAA approval is that Vanguard is allowed to sell any agency of the United States government. The U.S. military has become Vanguard's largest customer, attesting to its full acceptance of Vanguard LED Displays, Inc., as a TAA supplier, as well as its expertise, stellar service and the quality of its state-of-the-art products.
